

FIRE PROTECTION CONSTRUCTION PERMIT WORKSHEET

NOTICE: Effective immediately, **Fire Protection System plans** shall include a complete submittal for the project. For plan review purposes, plans shall be submitted including all calculations, specification data and the manufacturer's material, device, and equipment information.

Incomplete plans submitted will be returned for additional data and considered a first review for permit charges.

Examples of the elements of a plan submittal for automatic sprinkler and fire alarm system plans include, but are not limited to the following:

Automatic Sprinkler System plan submittal - Three sets of plans with a complete set of Building plans, Professional Engineers Stamp, Sprinkler Calculations & Flow Data, Sprinkler head specification.

Fire Alarm System plan submittal - Minimum required third party monitoring system with occupant notification (horn/strobes throughout), Three Sets of Plans with a complete set of Building plans, Professional Engineers Stamp, Battery Calculations with voltage drop, Sequence of Operation, Cut-sheets for Devices, Specified Design Criteria, Electrical schematic details

Plan Submittal Certification

I, _____ with _____
Company (please print name and company), the undersigned, affix my signature to certify that the **Fire Protection System plan submittal** is complete with all calculations, specification data and material/device/equipment and manufacturer's information included for plan review. _____ (Signature)
